DeskPRO Build #291 Released

2013-08-27 - Chris Padfield - Comments (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #291.

The following is an automatically generated list of changes in this release:

- IMPROVEMENT Add ability to provide per_page parameter to paged result sets in API calls
- FIX Some chat snippets not being inserted
- FIX Macro-filtering from status menu stops working after you apply a macro

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
