DeskPRO Build #69 Released

2012-07-25 - Chris Padfield - Commentaire (1) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #69.

The following is an automatically generated list of changes in this release:

- Offline message takes precedence over not-built error. Fixes error screen in user interface while new files are being moved into place
- Userchat phrases are raw
- Fix setters on Stat
- Fix html phrases
- Update JS phrase util to auto-escape for consistency with PHP one. Update uses in chat to use raw, as those locations already handle escaping.
- Fix viewing error log item always showing first log
- 404 on invalid usersources
- Add getIdFromCode self-contained in SessionEntityStorage

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
