DeskPRO Build #186 Released

2012-11-23 - Chris Padfield - Comments (0) - Release Announcements

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #186.

The following is an automatically generated list of changes in this release:

- Suppress "route not found" exceptions when not running in debug mode. Prevents errors when templates are outdated and routes have been removed.
- Fix the "show more" button on the website embeds page.
- Preload the btn-close.png image for the overlay as well.
- Fix images not being loaded properly in the overlay widget.
- Prevent potential race condition when setting a setting.
- Fix double-page loading when clicking on 'Manage KB' menu item
- Fix pageination on gateway errors page
- Fix typos
- Fix deleted downlaods showing in widget

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
