## New Feature: Create Tasks Automatically

2014-10-02 - Ben Henley - Comments (0) - Product

The DeskPRO **Tasks** app is a lightweight way to track and assign agent to-do items, beyond dealing with tickets.

A lot of customers have asked us about automatically creating tasks. In the latest build, you'll find this great new action available for your triggers, escalations and SLAS:

## then The following actions will run: Task Title: Create new ID card Due Date: 02 October 2014 Create Task Public: ✓ Yes Creator: Current Agent Assignee: 1st Level Support

The action can set a due date and assign the task to an agent or a team, just as if you were creating a task manually.

You'll find that when you create a new task yourself, it will now open in the content pane.

By popular request, you can also **double-click task titles and comments to edit them**.

(In case you're not using them yet, here's the agent manual section about tasks.)
