Add metadata for knowledgebase articles Collecting Feedback

RC Ruth Cheesley •

اسم المنتدى: # Feature Request

A knowledgebase may have public resources which are indexed by search engines.

Therefore, it should be possible to provide the meta description and associated SEO information as a bare minimum, so that entries in search engines are well optimised

PS. I am happy to help with writing this, but I have no way of contributing it. If you point me in the direction of .templates or something on GH I am happy to put some time into it and make a PR
