## Change new Article Status Collecting Feedback

- TF Timo Francke
- اسم المنتدى: # Feature Request

When creating a new KB article, the default status is "Published". Can we have an option to change the default ?so that agents aren't accidentally releasing unfinished or draft versions of Articles

I realize it is possible to restrict "Can validate content" for certain agents or groups, but it would be nice to .ensure even senior agents cannot accidentally publish an article

Totally agree. We want to give all of our agents the ability to create content, without the worry of accidentally .publishing something that is partially complete or not reviewed
