

## Changing the Colour of Stat Background Collecting Feedback

• C Christian

• اسم المنتدى: # Feature Request

.We would like to be able to update the colour on 'simple stat' widgets  
.Currently you can update charts (Pie charts, bar charts etc) using JSON but it isn't possible to update the stat

You can update properties of charts on dashboards using json. However this doesn't work for simple stats (or .table data). It could be helpful if these display types supported this functionality as well
