Compulsory time logging Collecting Feedback

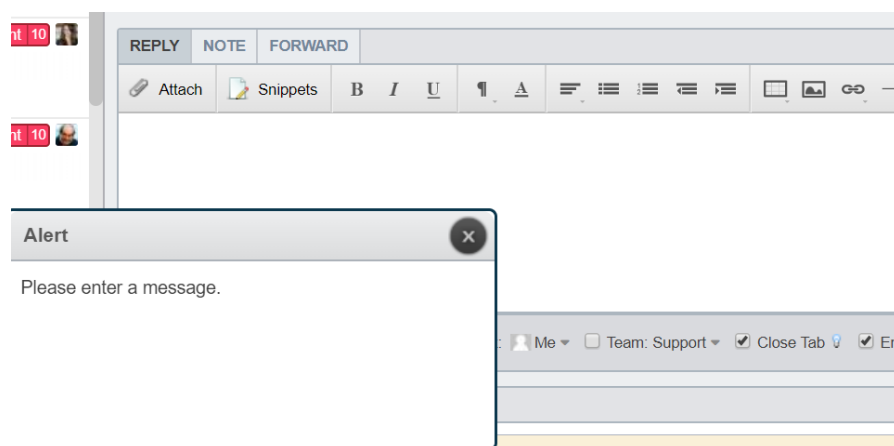

PV Paul Vonic •

Feature Request# **اسم المنتدى:** •

I'd like to be able to force agents to submit a time against the time log when they submit a .reply showing how long they've been working on the ticket

Ideally a pop up would be generated if no log had been entered for a specific reply and the .agent could enter the time here

A little like the Alert when you try and send a reply with not content (but with the functionality :to add the value in via the pop up window

That feature is absolutely essential. Since migration from Jira to Deskpro we miss this !feature
