

## Compulsory time logging Collecting Feedback

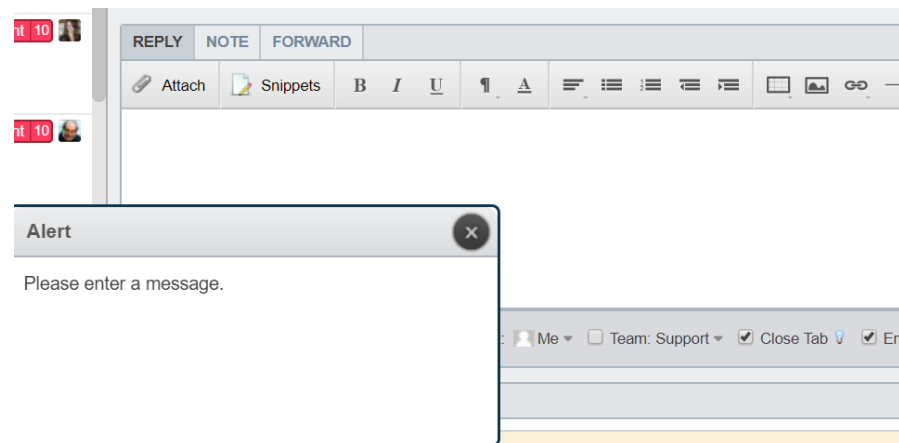

PV Paul Vonic •

Feature Request# [اسم المنتدى](#) •

I'd like to be able to force agents to submit a time against the time log when they submit a reply showing how long they've been working on the ticket.

Ideally a pop up would be generated if no log had been entered for a specific reply and the agent could enter the time here.

A little like the Alert when you try and send a reply with not content (but with the functionality to add the value in):(via the pop up window

We're migrating from a HelpDesk that has that, and it's a really missed feature. We're analysing how to workaround it. Discouraging to see this was commented 4 years ago and has 33 votes and no news from Deskpro.
