## Default Article Editor Collecting Feedback

D David •

اسم المنتدى: # Feature Request

.It would be nice to use the same editor across the whole "Publish" tab  
I'm am writing some guides and a lot of it involves tables, which work great on the knowledge base editor but  
.not on the guides editor

I've mentioned this on other similar feature requests: our company needs the same RTF toolbar on both articles  
and guide topics. We'd like both toolbars combined so that both articles and topics have the same icons - we  
.need to be able to edit HTML, include Markdown, insert notes, etc., in both articles and topics
