Hiding Untranslated Articles Collecting Feedback

Marco Sanz •

Feature Request# [اسم المنتدى](#) •

It would be useful to have a feature for hiding articles which have not been translated. Presently, Helpcenter shows content which is not translated even after a user has selected a specific language to view Helpcenter in. It would be beneficial to have only articles appear which are translated to the language the user has selected to view the interface in.

To me - this is crucial functionality. I was disappointed when I realized DeskPro does not currently support this.
