اسم المنتدى: # Feature Request

.If we create a custom field with field type Single-line Text Box or Multi-line Text Box

Field Type	Single-line Text Box
Enabled	<input type="checkbox"/> Enable this field
Title *	<input type="text" value="Detail Topik"/>
Alias	<input type="text" value="detail-topik"/>

Field Type

Multi-line Text Box

Enabled

Enable this field

Title *

Summary Permintaan

Alias

summary-permintaan

Description

Ringkasan permintaan dari user

.The content of this field is free text, just like the content of **Subject** field

When we create a Filter, for **Subject** field there is four option: **contains, does not contain, is, is not**

The screenshot shows a 'New Filter' dialog box with a title 'custom field filter'. Under the 'Criteria' section, there is a dropdown menu for 'Subject' with a search icon. A dropdown menu is open, showing four options: 'contains', 'does not contain', 'is', and 'is not'. The 'does not contain' option is highlighted in blue. There is also a 'Save' button at the bottom.

But, for a custom field with type is Single-line Text Box or Multi-line Text Box, we just have two options: **is** and **is not**.

The screenshot shows a 'New Filter' dialog box with a title 'custom field filter'. Under the 'Criteria' section, there are two criteria. The first is 'Subject' with a dropdown menu set to 'contains' and a text input field containing 'password'. The second is 'Detail Topik' with a dropdown menu set to 'is' and an empty text input field. A dropdown menu is open for the 'Detail Topik' field, showing three options: 'is', 'is not', and 'is not'. The 'is' option is highlighted in blue. There is also a 'Save' button at the bottom.

Could we add the option: **contains** and **does not contain** when we make a filter using a custom field with type: .single-line and multi-line text box
