New functions for new multibrand actions Collecting Feedback

Samuel Waser •

Feature Request# **اسم المنتدى:** •

Great to have the new functions for multiple brands - thanks for that!

It would be great to have the following as well:

1. Map a UserGroup to a Brand (With that one can map an organisation to a UserGroup and therefore all users of this organisation would get the Brand permission)
2. Get a field "Brand" in the advanced search within the CRM app
