One customer with several organizations Collecting Feedback

RL Raul Lopez •

Feature Request# **اسم المنتدى:** •

I consider it is interesting the option that one customer can have several organizations, for example, in case we have a boss who is the responsible of two organizations he only can see .the tickets of one of them

This would be a very helpful feature, as we have IT personally locally that work for many of our clients

This would be extremely useful for us. We have several clients that contract with the same IT company for network support. Currently there is no way for a ticket related to a client, but .addressed to an IT person, to be linked to the client's account. That's a problem
