## Readthedocs Import/sync Collecting Feedback

YA Yuriy Andamasov •

Feature Request# [اسم المنتدى](#) •

<https://readthedocs.org/> is software documentation management application widely used these days. Many projects including our use it, and it will be great if we could think this to guide(s) in an automated way since this will save us tones of time. We work on documentation collaboratively, and often many external people participate and it's not always feasible or possible to provide access to deskpro, while we still control Pull Requests with changes that applied
