Sending messages to ccs without sending to the ticket owner Collecting Feedback

KH Kieron Hill •
اسم المنتدى: # Feature Request

.Currently in Deskpro there are two options in triggers on who to send user messages to

1. The ticket owner

2. (Everyone on the ticket (which includes the owner and ccs

.It would be helpful if there were a third option for sending just to the ccs

This would allow separate triggers to be setup for sending to the owner and sending to ccs so different content could be added if required
