Snippet Owner Collecting Feedback

Peter Huber •

Feature Request# [اسم المنتدى](#) •

We want to create a snippet which can only be changed by one person (the owner) but used .by a specific department, and only have this behaviour applied to specific snippets

.So, e.g. the owner is me and the department is support-team

But noone of the department can see this snippet, as long as I am the owner. After changing the ownership to everyone, all members of the department can see this snippet, but can also .change this snippet
