Personalize your Help Center and Content

Getting Started - تعليقات (٠) - Lara Proud - 2023-09-12

The first step to personalizing your helpdesk is by naming it and adding your website details.

To add information about your helpdesk go to **Admin > Configuration > Branding**. Select the brand you want to update:

From here, you can edit your brand settings which will update them from the helpdesk defaults. You can update:

• Brand Name
• Favicon
• Avatar
• Brand Logo
• Website Name
• Website URL
• Help Center Name
• Your sub-domain

From **Admin** > **Configuration** > **Branding**, you can also create additional branded Help Centers for different end-user-facing Help Centers by selecting **Add a Brand**.

You can also manage the appearance of your various Help Centers in **Admin > Help Center > Help Center Design**. This lets you change your welcome message, fonts, and colors and add a logo to make your Help Center truly reflective of your brand.

For more information about **Help Center Configuration and Branding** .see the [Help Center Design](#) section of the Admin Guide

.Or read the next section in this **Getting Started** series on [Creating Dashboards](#)
