### Download ticket queue/list results

The easiest way to download tickets is by running a queue or list from the agent interface. When results load, switch to the table view and then click on the CSV button on the bottom left.

| | ID | Subject | Agent |
|---|---|---|---|
| ☐ | 196 | Problem reading the meter (Email) | U |
| ☐ | 195 | Need help with reading the meter | A |

**Download tables generated from a report**

You can create a stat (or use a built-in stat) to generate a *table* report. From here, you may download the results as CSV.

Refer to the full reporting guide for information on using reports: [Using the Stat Builder](#)

## Using the Deskpro API

If no other option provides the flexibility you need, then you can use the Deskpro API. Refer to the developer guide here: [About the API](#)
