How can I add translations for the Welcome Message on the Help Center

[Help Center](#) - [تعليقات \(.\)](#) - Julien Ducro - 2023-10-19

If you need to support a multi-lingual Help Center, you will need to edit the Help Center Template, rather than use the simple welcome message box in the **Help Center Design** tool

The screenshot shows a 'Theme Options' panel with three sections:

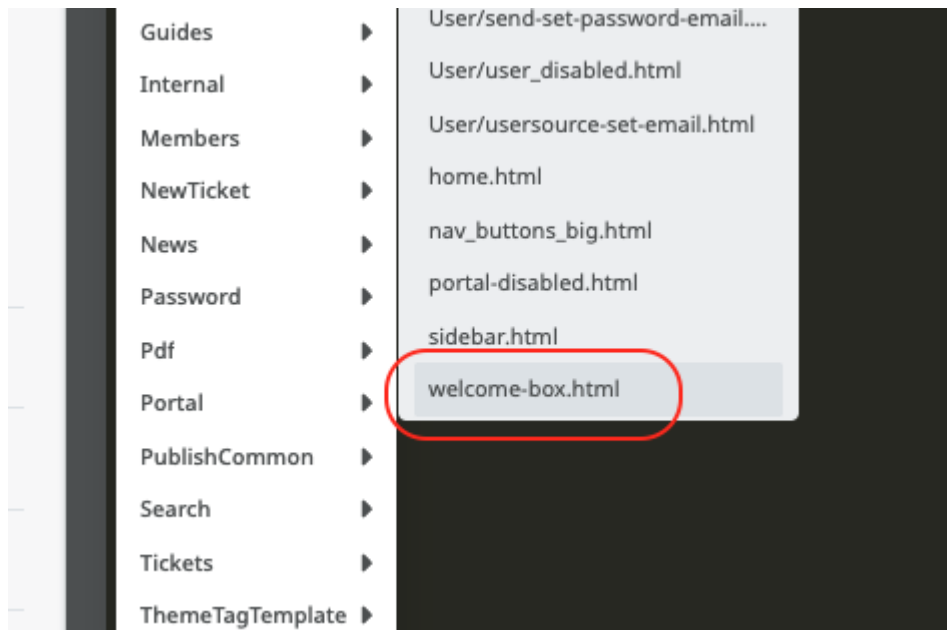

- Welcome box title**: A text input field.
- Welcome message**: A larger text area for a multi-line message.
- Logo**: A 'Choose file' button.

Edit the **Portal > welcome-box.html** template in the Template Editor to add different versions of a Welcome Message based on the language selected in the Help Center by the User

:To do this

Go to **Admin > Help Center > Help Center Design > Open Template Editor** •

Select the **Portal > welcome-box.html** template •

.Edit the code appropriately and save •

Here is an example of code you could use within this template

```

if true or theme_option('welcome_box') and (theme_option('welcome_box').title or %)
  theme_option('welcome_box').message) %)
  <div class="dp-po-homepage-welcome-box">
    <div class="dp-po-block">
      {% if lang_code() == "fr" %}
        <h1>
          Mon titre en français
        </h1>
        <p>
          Mon contenu en français
        </p>
      {% else %}
        <h1>
          My Default Title
        </h1>
        <p>
          My Default Content
        </p>
      {% endif %}
    </div>
  </div>
{% {% endif

```

In this example, when a User selects French from the dropdown menu they will be shown the Welcome Message .in French, if they have any other language selected they will be shown the Default Message you enter
