

?How can I best link to other Help Center content

[Agent](#) - [تعليقات \(.\)](#) - Eloise Rea - 2023-06-22

When creating and publishing content you may want to link to other relevant content that already exists on your Help Center. These could include other Guide Pages, News Posts, or Knowledgebase Articles

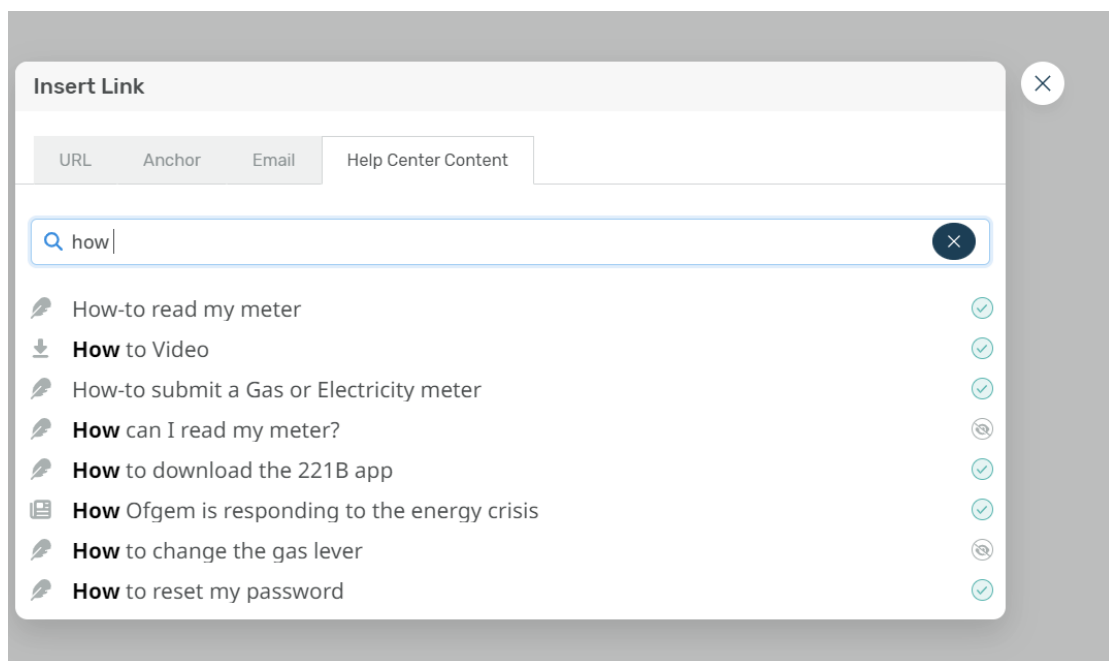

While you can hyperlink as normal, using the Help Center Content link allows you to embed links to other content from your Help Center and differentiate this content

:In order to achieve this

1. Highlight the text you'd like to link from

2. Click the 'Add Link' symbol on the content editor toolbar

3. Select the tab **Help Center Content**, search for the correct item, and click **Insert**

.This will insert a formatted link to the other piece of Help Center Content

The screenshot shows the WordPress editor interface. On the left sidebar, there are sections for 'URL Slug' (how-to-view-your-energy-bill-or-statement), 'Language' (English), and 'Translations'. The main editing area has a title bar 'Editor' and a toolbar with various formatting options like Paragraph, Bold, Italic, Underline, Strikethrough, Bulleted List, Numbered List, Link, Unlink, Quote, Code, Image, Video, Audio, Embed, and Source code. Below the toolbar, the article content is visible, starting with two paragraphs about managing an online account and submitting a meter reading. A small tooltip is shown over the word 'meter' in the second paragraph, displaying the shortcode `{{ content(article, 2) }}` and its corresponding URL.

:And the content will appear in the Help Center like below

How to view your energy bill or statement

Last updated: Jun 19, 2023 by Admin

If you manage your account online, you'll be able to see all your previous bills and statements. You can also download and save a copy on your computer if you want. If you need more historical bills and statements, contact our live chat agents.

If you want to learn how to submit a meter reading, you can check out this guide: [How-to submit a Gas or Electricity meter.](#)
