How can I connect Deskpro to other apps that ?aren't yet integrated

David Pinto - 2023-09-12 - يعليقات (٠) عليقات - David Pinto

Zapier is a simple and powerful automation tool that lets you connect
Deskpro to over a thousand other web services and applications.
Automated connections called Zaps can be set up in minutes with no coding, can automate your day-to-day tasks, and build workflows between
.apps that otherwise wouldn't be possible

Zaps in Zapier works a lot like Deskpro's Triggers. Each Zap has one app as the Trigger, where your information comes from and which causes one .or more Actions in other apps, where your data gets sent automatically

To get started with Zapier, sign up for a free zapier account, from there you :can jump right in. To connect Deskpro to your Zapier account

- .Log in to your **Zapier account** or create a new account .1
- .Navigate to "Connected Accounts" from the top menu bar .2
- "Now click on "Connect new account" and search for "Deskpro .3
- Use your credentials to connect your Deskpro account to Zapier. You .4 will need to enter your helpdesk URL and an API Key which you can find in .Deskpro under **Admin > Apps > API Keys**
 - Once that's done you can start creating an automation! Use a pre-made .5 Zap or create your own with the Zap Editor. Creating a Zap requires no .coding knowledge and you'll be walked step-by-step through the setup
 - .Need inspiration? See everything that's possible with Deskpro and Zapier .6
