How can I make agents record a solution for each ticket?

[Admin](#) - [تعليقات \(0\)](#) - Chris Robinson - 2023-08-24

:Question

I would like to make my agents record how each ticket was resolved. Is there a way to add a compulsory 'Solution' field to Deskpro that is required to resolve a ticket?

:Answer

.You can implement this easily using a custom ticket field

1. Go to **Admin > Ticket Structure > Ticket Fields**

2. Click **New**

3. Select a **Single-Line Text Box** or **Multi-Line Text Box** depending on how long a description you want agents to enter (or you could create a multiple-choice field using **Select Field**)

4. You don't want users to see this field on the portal, so select **Agent only field**

5. Select **Require the agent to provide a value** and **Only agent validation when the ticket is being resolved**

Add: New Field

Field type

Single-line Text

Title*

Agent Resolution

Enabled

Agent only field

Hide field from users, only agents will be able to see and edit this field.

Agents Form ?

- IT Support
- Complaints
- HR
- Finance
- Training Booking

Description
