How can I show text on the Help Center only to a certain usergroup

[Help Center](#) - [تعليقات \(.\)](#) - Hannah Scott - 2023-09-13

:Question

?How do I edit a portal template to show some text only to users who belong to a particular Usergroup

:Answer

First, find the ID number of the Usergroup you wish to show the text to in **Admin > CRM > Usergroups**

Title	Type	Description	Count	ID
Employees			0	0
Everyone	Built-in	Every user including both guests and registered members.	0	1
Registered	Built-in	All registered people in the system	0	2

:Now add this to the Help Center template where you want the message to appear

```
{% (if app.user.isMemberOfUsergroup(N %}
```

Text to display

```
{% endif %}
```

."replacing N with the ID of the usergroup, and putting the message you want in place of "Text to display

.See the admin guide for [Editing Help Center Templates](#)
