

?How do I add a custom favicon to the Help Center

[Help Center](#) - [تعليقات \(٠\)](#) - Lewis O'Connor - 2023-08-29

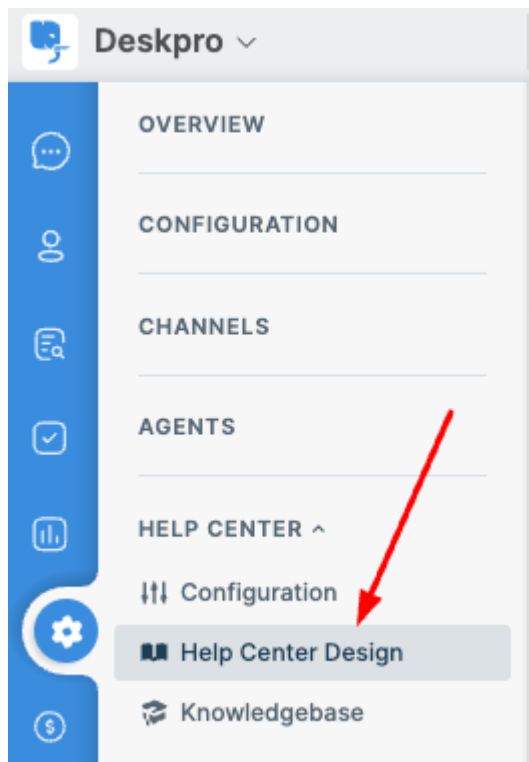

.The favicon is the small icon displayed at the top of browser tabs and next to bookmarks

By default, your Help Center favicon will be the Deskpro icon but you can choose to use your own favicon instead.

Note that the .ico image format, commonly used for favicons, is not supported. Instead, you should prepare a .png or .gif format image, sized 16x16 or 32x32 pixels

Go to **Admin > Help Center > Help Center Design**

.You should now be able to see the current favicon in the **Theme Options** section

Theme Options

Welcome box title

Welcome message

Logo

Favicon

...If you wish to use your own favicon, simply click **Delete** to remove the current one

Favicon

Delete

.Then click **Choose File** to upload your new favicon

Favicon

Choose file

.You should now see your chosen favicon presented instead of the old one

Favicon

Delete

.You then need to click the **Save** button, at the bottom of the section, to update your Help Center theme

Save

Discard Changes

.Once saved, you can see your new favicon in action

Deskpro
