How do I automatically tell users who submit tickets by email to use the Help Center

[Admin](#) - [\(0\) تعليقات](#) - Russell Chappell - 2023-09-13

If you want your users to submit tickets through the Help Center (so they have to set a category or fill in specific fields, etc.). But you find that a lot of your users are starting to send in new tickets by email, bypassing the Help Center. You can set up a **New Reply Trigger** and **Custom Email Template** to automatically reject email tickets and ask users to submit via the Help Center instead.

To start you need to create an email template, go to **Admin > Channels > Emails > Template** and click on the .add template button

:Here's an example template

```
:Subject
{{ ('phrase('user.email_subjects.tickets_re' }}

:Body
html>>
<head>
{% include 'SendmailBundle:blocks:resources.html.twig' %}
</head>
<body>
{% include 'SendmailBundle:emails_common:email_code_top.html.twig' %}
{% include 'SendmailBundle:blocks:header.html.twig' %}

<p>Please note that all support requests must be submitted through <a href="{{
url_full('user_tickets_new') }}">our Help Center contact form</a>.</p>
<p>No ticket has been created for your issue and this email has not been read by our
agents. Once you have submitted your request through the Help Center, you will be able
to correspond with our agents by email as usual.</p>

{% include 'SendmailBundle:blocks:footer.html.twig' %}
{% include 'SendmailBundle:emails_common:email_code_bottom.html.twig' %}
<</body>

phrase('user.email_subjects.tickets_re') }} just inserts the subject of the original email with "Re:" on the }}
```

.front, and `{{ url_full('user_tickets_new') }}` is the URL of the Contact Us section of the Help Center

.Save the new template

Next, go to **Admin > Business Rules > Triggers** and create the new reply trigger. We only want it to run
:when a *user* submits a ticket via *email*, so we use these **Event** settings

2 Event

Event

New reply

By User

Help Center API Email

Phone SMS WhatsApp

Twitter Trust Pilot

By Agent

3 Criteria

.We want to send an auto-response telling the user that they have to go to the Help Center

Change the default action to **Template Emails > Send Email to User**. Select **Create a new template** and
:select the template you created earlier

4 Actions

These actions will apply when all of the criteria pass.

Then the following actions will run

Send email to user

Select...

- All
- Ticket assignment
- Ticket properties
- Ticket actions
- Ticket SLAs
- Ticket approvals
- User fields
- Unknown translation key
- Template emails
- Trigger controls
- Chat
- Ticket fields

Send agent email

Send email to user

Send to specific emails

:Set the other options for sending the email

4 Actions

These actions will apply when all of the criteria pass.

Then the following actions will run

Send email to user

Templates user_reply_use_help_centre.html

To Email only ticket owner

From name Helpdesk name

From email The account set on the ticket

Add headers

It's probably best to email just the ticket owner and not anyone who was CC'd, otherwise everybody on the .original email might try to submit a ticket for the same issue

Now we've told the user to submit via the Help Center, we want to get rid of the ticket that was created by their .email

.This is easy; just add a **Ticket Actions > Delete Ticket** action

Once the trigger runs, we don't want any other triggers to run afterward, so we can add a **Trigger Controls > Stop Processing Triggers** action

.The trigger is complete. Click **Create**

.Now it's important to drag the trigger to the top of the trigger list, so it runs before any other triggers
