How do I make tasks visible to certain agents, teams, or departments

[Agent](#) - [تعليقات \(.\)](#) - Paul Davies - 2023-08-10

Managing the visibility of Tasks within your helpdesk is crucial for optimizing department, team, and individual agent workloads. You can control which Tasks are visible to different groups in the helpdesk by adjusting the **Visibility** and **Assignment** settings in individual Tasks.

Configuring Task Visibility

When you're configuring **Visibility** settings, you will have the choice between **Public**, **Private**, or **Departments**.

The screenshot shows a 'New Task' form with the following details:

- Description***: Sending a client email
- Due date**: 15 November 2023 09:30 (with a 'Clear' button)
- Assign to**: (M) Me
- Visibility**: (P) Public

The Visibility dropdown menu is open, showing a search bar and the following options:

- (P) Public (checked with a checkmark)
- (P) Private
- Customer Support
- Customer Support - EU
- Customer Support - AUS
- Customer Support - USA
- Complaints
- IT Support
- HR

Private: This setting ensures that only the creator and assignee of the task can view it.

Public: Opt for this option if you want all agent accounts associated with your helpdesk to have access to the task.

Departments: If you've opted for a department-specific visibility setting. This ensures that only agents from the

.designated department can view the Task

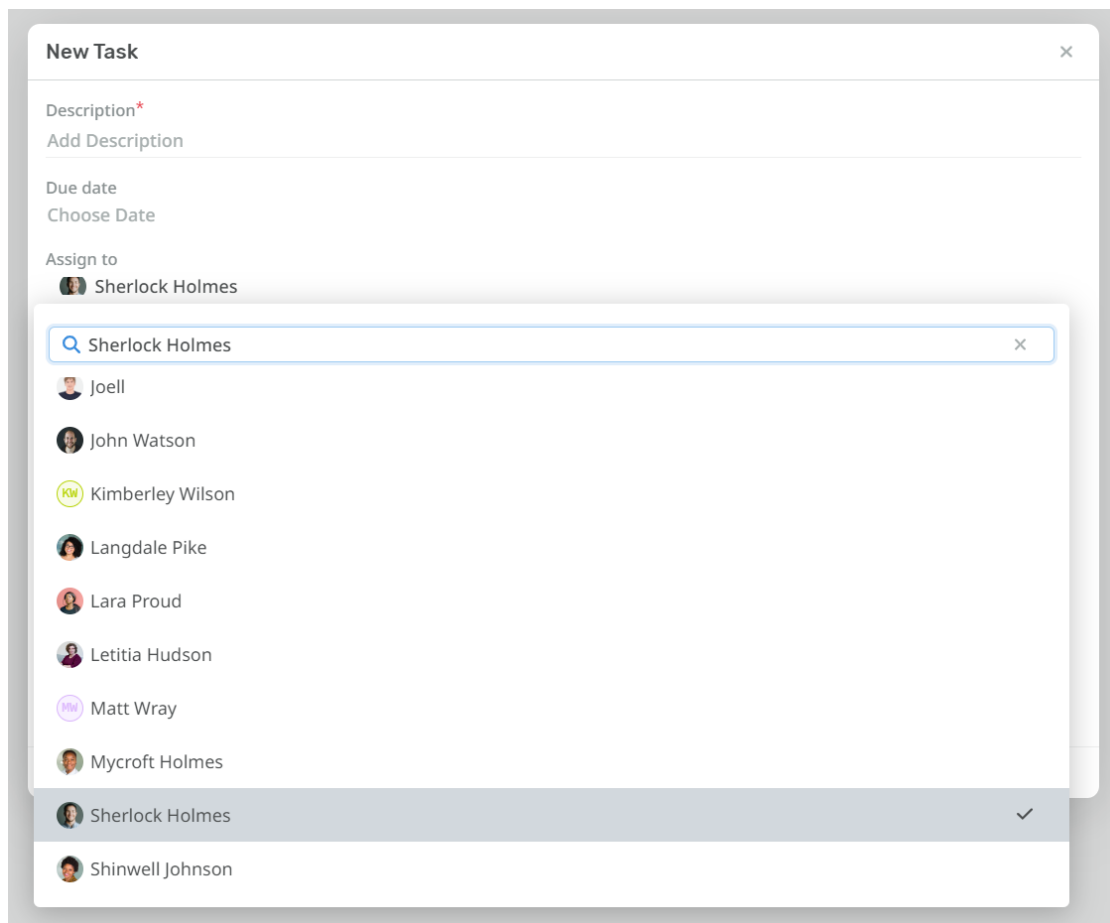

Assigning Tasks to Agents or Teams

After configuring the visibility of a Task, you can then assign the Task to the appropriate Agent or Team. The Assignment will interact with the visibility, so if a task is private and you assign it to a Team, only that team will .be able to see the Task

:For assigning Tasks, the following choices are available

Team Assignment: Assign the task to the relevant team. If visibility is private, this restricts task visibility to .agents within the assigned team

Agent Assignment: Assign a specific agent. Again, if visibility is set to private, only the agent that is directly .assigned the Task will be able to view it

The image shows a 'New Task' dialog box with a search and selection interface. The 'Assign to' field is active, displaying a search bar with 'Sherlock Holmes' entered. Below the search bar is a list of agents, with 'Sherlock Holmes' selected and highlighted in grey. A checkmark is visible next to the selected agent.

Agent Name	Selected
Sherlock Holmes	Yes
Joell	No
John Watson	No
Kimberley Wilson	No
Langdale Pike	No
Lara Proud	No
Letitia Hudson	No
Matt Wray	No
Mycroft Holmes	No
Shinwell Johnson	No
