

## How do I resize the panes of the agent interface

Deskpro Legacy - تعليقات (0) - Ben Henley - 2023-08-31

You can change the relative size of the agent interface list pane and content pane. Just drag the divider between them. This can be useful if you are working in a small browser window or using a low-resolution monitor.

.Don't forget that you can also switch to 1-column mode using the icon at the top right
