

## I'm having trouble dragging and dropping attachments from Outlook to Deskpro

[Deskpro Apps](#) - [تعليقات \(٠\)](#) - Ben Henley - 2023-08-16

### :Question

I want to be able to drag an attached file from an email in the desktop version of Outlook into a Deskpro ticket. It doesn't work if I drag straight from Outlook, but dragging files from a folder does work. Is there any way around this?

### :Answer

.This is a limitation of Outlook that applies when dragging files into any web-based app  
You can enable drag and drop directly from Outlook into all web apps, including Deskpro, by installing the [Outlook2Web](#) add-in.
