

I'm having trouble getting Jira-related triggers to work

Admin - (٠) تعليقات - David Anjonrin-Ohu - 2023-08-10

:Question

I've installed the Jira app within Deskpro and set it up. I notice some new Jira-related trigger criteria and actions that don't work. What's wrong

:Answer

After you've installed the app, you need to do a little more configuration of inbound webhooks in Jira before you can use Jira-related triggers and actions

.Check out [our guide](#) to learn how to use Jira with our Triggers system
