I'm having trouble with an error: "Email address "already exists"

[Admin - \(0\) تعليقات](#) - Felipe Bessa Coelho - 2023-08-29

If you're trying to change an agent's email address in the admin interface and you get the error: "Email address .already exists". This is because the Email Address is already associated with a User on the helpdesk

The screenshot shows a form titled "Contact Information" with a plus sign. Below the title, there is an email address field containing "example@example.com". To the left of the email address is an envelope icon, and to the right is a flag icon. Below the email address, a red error message reads "Email address already exists". At the bottom right of the form, there are two buttons: "Save" and "Cancel".

.You can use the Global Search app to locate the User profile from the email address

If this is the email address that is associated with the individual who will be the new Deskpro Agent, you can convert the User into an Agent account, change the User's email address, or delete the User profile and then try .and create the Agent Account again

Warning

.Deleting the User Profile will also delete all Tickets associated with that User
