I'm having trouble with being redirected to the wrong helpdesk address

[Configuration](#) - [تعليقات \(٠\)](#) - James Godwin - 2023-08-24

:Question

I changed the IP or custom domain for the helpdesk. Now, when I try to visit the Help Center or the agent interface, I get redirected to the wrong address. How can I fix this

:Answer

You should be able to access the admin interface at *yourdomain.com/app#/dashboard* on the new address.
.Go to **Admin > Configuration > Brands** and update the **Helpdesk URL** setting
