:Question

:During the process of installing the Deskpro JIRA app, I get an error like this

JIRA responded with error:400: Bad
Requestoauth_problem=timestamp_refused&oauth_acceptable_timestamps=1449602521162-14496
03121162

:Answer

This problem happens because the time on the server that runs Deskpro is wrong. Make sure the server time is
.set accurately
