

JIRA "400: Bad Request oauth_problem=timestamp_refused" error

Deskpro Apps - (.) تعليقات - Ben Henley - 2017-11-08

:Question

:During the process of installing the Deskpro JIRA app, I get an error like this

JIRA responded with error:400: Bad

Requesttoauth_problem=timestamp_refused&oauth_acceptable_timestamps=14
49602521162-1449603121162

:Answer

This problem happens because the time on the server that runs Deskpro is wrong. Make
.sure the server time is set accurately
