JIRA "400: Bad Request oauth_problem=timestamp_refused" error

[Deskpro Apps](#) - [\(0\) تعليقات](#) - Ben Henley - 2017-11-08

:Question

:During the process of installing the Deskpro JIRA app, I get an error like this

```
JIRA responded with error:400: Bad  
Requesttoauth_problem=timestamp_refused&oauth_acceptable_timestamps=1449602521162-14496  
03121162
```

:Answer

This problem happens because the time on the server that runs Deskpro is wrong. Make sure the server time is .set accurately
