

MISSING: /dev/bin" errors"

Deskpro Legacy - تعليقات (٠) - Ben Henley - 2017-11-10

:Question

?Why do I get a series of errors like this during an installation

MISSING: /dev/bin/cache-clear

MISSING: /dev/bin/console-api

MISSING: /dev/bin/console-dp

MISSING: /dev/bin/console-portal

:Answer

This false warning can happen due to a bug in a previous version of the Deskpro install .wizard. It does not indicate a real problem, and you can safely skip to the next stage
