## Number of times 'Downloads' have been downloaded in the user portal

DPQL Examples - (۱) تعلیقات - Lauren Cumming - 2023-09-08

Question

I would like to know if there is a way to track how many times files are downloaded from our support portal

## **Answer**

You can build a custom report to get this information: **Reports > Stat Builder > Add.** Enter :a title and description for your report and the following query

SELECT downloads.id, downloads.date\_created, downloads.title, downloads.num\_downloads FROM downloads ORDER BY downloads.num\_downloads

You can also add downloads.num\_ratings to the SELECT line if you want to see number of .ratings per download too

.There is a full list of download schema here
