OpenAI Usage Cost & Management

[AI - \(.\) تعليقات](#) - Lara Proud - 2025-11-18

When using Deskpro's AI features, requests will be made between Deskpro
(and your AI provider (in this case OpenAI

Usage costs will be automatically billed from the credit that you have added to your connected OpenAI account, this provides a fairer way to pay only for the AI features that you use. The exact cost to use each feature will depend on several factors including the input and output tokens required when making the request and is [subject to OpenAI's pricing](#)

Approximate Cost per Feature

The table below is designed to provide examples of typical usage costs per
AI feature that is enabled

Warning

Exact costs may vary depending on the length of messages, the number of messages on a ticket, and input and output tokens and are subject to changes in token usage pricing from OpenAI

Cost per (.1000 (approx	Singular Use (.Cost (approx	Assumptions	AI Feature
per 1000 \$0.65 expansions/ enhancements	\$0.00065	Using an agent- drafted reply of approx. 150 words	Expand Reply/ Enhance Reply
per 1000 \$12.50 ticket summaries	per ticket \$0.0125 summary	Using a ticket thread consisting of approx. 50 messages (250 words each	Summarize Ticket
per 1000 \$0.50 incoming ticket messages	per \$0.0005 incoming ticket message	Intent detection enabled matching ticket messages (250 words) against two intent sets	Intent Detection
per 1000 \$0.30 incoming ticket messages	per \$0.0003 incoming ticket message	words per 250 incoming ticket message	Sentiment Analysis

Monitoring Usage in Deskpro

You can keep track of all the requests being made by AI features in Deskpro by navigating to **Admin > AI > AI Setup & Logs > AI Logs**.

Access to AI-powered agent productivity features can be limited per feature using specific Agent permissions or via permission groups.

Setting Limits in OpenAI

You can set monthly billing limits within OpenAI to restrict the maximum amount of credit used per month and configure notifications once a lower limit has been reached [here](#).
