Reporting on Linked Tickets

[Reports](#) - (0) [تعليقات](#) - Matthew Wray - 2023-08-24

:If you'd like to view parent tickets and the child tickets associated with them you can run the report below

```
SELECT tickets.id, tickets.subject
      FROM tickets
     WHERE tickets.parent_ticket.id <> 0
    SPLIT BY tickets.parent_ticket.id, tickets.parent_ticket.subject
```

:This will output a table per parent ticket, containing all child tickets linked to it, as per the image below
