Upgrading to Deskpro Horizon: A Guide for Agents

Horizon Migration - (٠) تعليقات - Lara Proud - 2024-10-21

Your Helpdesk is Evolving

The Deskpro team has been diligently working on a revamped design and enhanced experience for the Agent Interface of your Deskpro helpdesk. If you're reading this, it means .your system is about to be upgraded to our new version, known as Deskpro Horizon

While the design has been updated, we have ensured that the core features and functionalities you rely on remain intact. It might take a brief period to adjust to the new .layout, but this article will guide you through the changes so you know what to expect

Key Information

Upgrade Schedule: Your admin will inform you of the exact date and time for your • upgrade. The upgrade process is expected to take less than 30 minutes, during .which the platform will be inaccessible

New Login URL: You will now login at • https://<accountname>.deskpro.com/app. The previous URL ending in ./agent will automatically redirect to the new one

New Mobile Apps: Deskpro Horizon comes with new mobile apps. Please download • .the updated apps as the old version will no longer be functional

App Store • Google Play •

Interface Highlights

:Here's a screenshot outlining some of the key updates to the agent interface

Video Tour & Webinar

:We've created a brief video tour to walk you through the key changes in the interface

Notable Changes

Here are some important layout and naming changes to be aware of, many of which are :detailed in the video and screenshots

Automatic User Profile: The user profile now loads automatically on the right when • .you open a ticket, eliminating the need to click to view it

Embedded Chat: Chat is now integrated within a ticket, making it easier to respond • .via email

Live Status: New live status indicators show tickets that are active chats or voice • .calls

UI Management: The interface layout is now easier to manage. You can • collapse/expand the first column and choose between a "dual", "list", or "kanban" .view for tickets

Ticket Menu: A crucial menu in the top-right corner of a ticket allows actions like • .Delete, Merge, Add Task, or Bill

Ticket Access: Filters have been replaced by Queues, Lists, and Search. Queues, • managed by admins, display counts and typically include tickets needing action. Lists, customizable by admins or agents, can include resolved tickets. Custom Filters will transition to Lists. Email subscriptions are available only for Queues, so request your admin to create a Queue if needed. Our new search experience is optimized for .textual searches within ticket messages

Ticket Actions: Ticket Actions can be applied from a dropdown **More** menu on the • top right-hand corner of a ticket, with the option to pin the more useful actions in .your workflow to be displayed

Icons for Global Functions: Global Search, IM, and Notifications are now icons in • the top-right corner, offering a column view that can be locked for widescreen .displays

Snippet Search: The search shortcut for Snippets has changed from %shortcut to • /shortcut. Look for new features in this menu soon. The snippet list is accessible .via an icon in the top-right of the reply box

. Macros: Now managed by Admins and executed from the rocket icon $\, \bullet \,$

.Flags to Stars: Flags have been renamed to Stars •

User Profile Location: Found in the bottom left corner, where you can log out, • manage preferences, control email notifications, and find a QR code for mobile login. .Chat and voice indicators for setting online/offline status are located to the right

We're Here to Help

We hope you enjoy the new Deskpro experience. If you encounter any issues, our friendly .support team is ready to assist you: <u>Contact us</u>
