

?Why is part of the Agent Interface out of view

[Agent](#) - [تطبيقات \(.\)](#) - Lara Proud - 2023-06-08

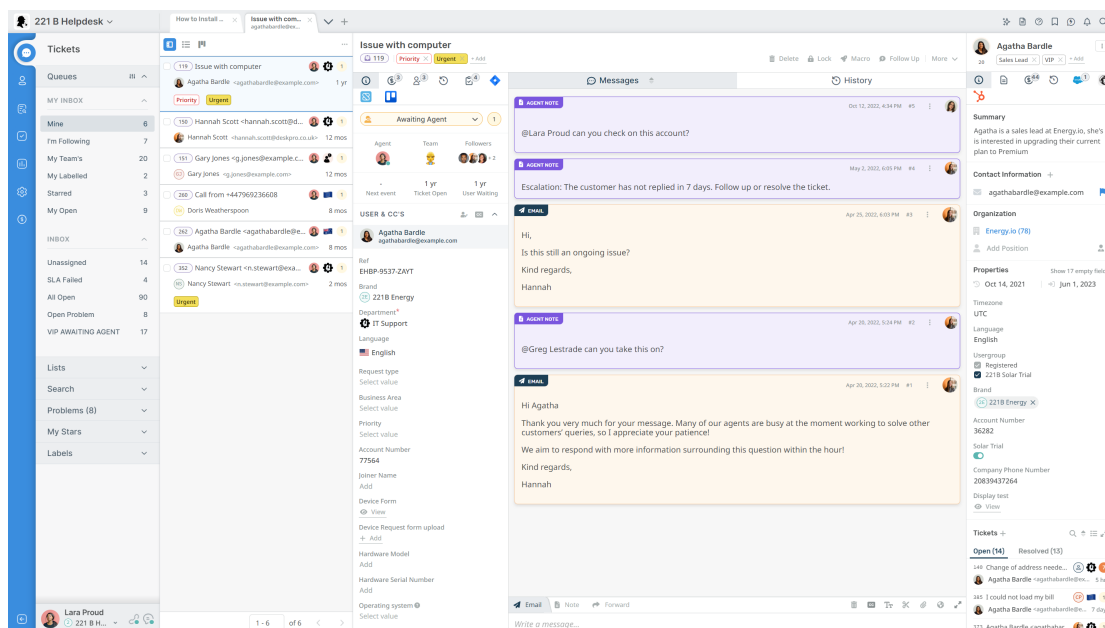

You can change how the Agent Interface appears for your account, this will vary between Agents depending on your viewing preferences. If you find yourself in a view you don't want to use you can easily switch to a different option from the top left of the ticketing interface

:The viewing options available are as follows

Dual View

Dual View shows the Tickets in a Queue in a separate view column, you can edit the fields that appear on the cards to provide you with a clear overview of the tickets alongside an open ticket and you can easily navigate between tickets from here by choosing different tickets from the list

You can resize the width of the column of ticket cards, and the width you set will be remembered as your preferred layout.

Table View

Table View presents the tickets in an adjustable table where all the tickets are listed across the width of the interface. Clicking on a ticket in this view will open it in front of the ticket list.

ID	Subject	Agent	User	Date Last Reply	Ref
