We are pleased to announce the release of Deskpro version 2019.7.2. This is a hotfix release to address two bugs as described below.

:Bug Fixes

- CH-2682   Rendered raw HTML in exception message: A 404 error message could render raw HTML from the path provided.
- CH-2710   Article editor opens content of another article: When multiple articles are open at the same time, clicking "edit" will always have the content of the first article.
