:New Features

The following features have been automatically available for new customers and available for existing customers to test for a few months, however, we are officially launching these today

- New [Help Center Theme](#) for the portal •
- New [Messenger widget](#) •
- [Improved Email Templates](#) (including a new template editor) •

Additionally, we have some other exciting new features available from today

- Control whether Pending status is counted in SLAs and ticket waiting times. Find out more [here](#) •
- Report on user waiting time and first reply time within working hours. Find out more [here](#) •
- Trigger criteria for custom date fields now support selecting a relative time in the future (e.g 2 days/months/years from now) •

:Bug Fixes

- CH-15792 - Intermittent error caused when a user approves/rejects an Approval request via the portal •

- CH-6074 - Prevent Agent permissions from causing an error when an Admin tries to add an Approval .type ●
- CH-14658 - Ensure the default values for built-in fields (e.g. Category or Product) are displayed in the .contact form when a parent/child hierarchy is being used ●
- CH-14823 - If you apply a Macro from the reply button which should send a reply and unassign the .ticket, the ticket is not changed to 'unassigned' ●
- CH-15662 - The toggle to enable/disable Guides for the portal isn't working ●
- CH-11022 - The Snippet manager closed automatically after clicking the 'Languages' menu when a .language pack has been uninstalled ●
- CH-15431 - Don't display the shortcut code for snippets that are removed when a language pack is .uninstalled ●
- CH-13738 - Fixed the "Requested unknown parameter" error which occurred when adding particular .built-in stats as widgets to a dashboard ●
- CH-15452 - Unable to successfully drag an attachment from a ticket to desktop ●
- CH-15672 - When a cron job fails, don't retry until the next interval ●
- CH-15441 - Add CSRF token on profile/emails?remove_email ●
