Deskpro Android App Release 1.01

Deskpro Releases - (٠) تعليقات - Benedict Sycamore - 2017-10-04

We're delighted to announce the release of Deskpro for Android 1.01

Deskpro for Android 1.01 includes the feature updates, bug fixes and improvements listed below:

Features:
- Ticket attachments can now be opened
- Users now have the ability to 'set ticket to spam'

Improvements:
- Department lists now display in the correct order set by user
- Date formats are now localized
- Users now have the ability to set captcha requirements via the app

Bug fixes:
- Better helpdesk detection and recognition when HTTPS is enforced
- Blank log in error now resolved

To download the latest version of Deskpro for Android, visit the Google Play Store.
