DeskPRO Build #107 Released

2012-08-24 - Security Test - [تعليقات \(0\)](#) - [Deskpro Releases](#)

.We are pleased to announce a new release of the DeskPRO helpdesk platform, build #107

:The following is an automatically generated list of changes in this release

- Hide the query editor from the main report builder page as well by replacing it with an introduction section
- .Only show the query when printing when it's not coming from a saved report
- Add automatic linking support when referencing a relationship (like tickets.agent) that has a known linking method (using ID only)
- Add basic LINK(print, url, [args]) function that allows links to be generated in HTML output. The link parameter defaults to being relative to the DP root and takes params in sprintf format
- Fix offline message when no db connection made yet (eg cron from upgrade)
- Fix a couple bad log lines
- Fix path to breadcrumb-bullet.gif
- Enable 'agent' grouping under team tickets
- Fix transaction nesting, possible un-persisted validating email record
- Fix invalid token name in resolveDeletedTicket
- Fix error when chat user comes back after timeout
- Handle when validating address already a user
- .Hide the query for a built-in report by default
- Ensure that the report loading indicator is always displayed and that you are scrolled to the main report contents properly
- .Clean up column titles on built-in reports where possible
- .Better display of the report list
- .Remove commas from year output
- .Favoriting a report adjusts the favorite list in the sidebar automatically
- .Automatically adjust the hight and labels usage on pie graphs that have a lot of slices
- .Use expandable textareas in the query builder
- .More spacing between report items
- .Larger default report sidebar
- .Make reports load via AJAX (hash change events) where possible
- Show send feedback window on JS error
- After upgrades, clear the CSS cache blob so its regenerated based on any new css templates
- Fix lic check counting deleted agents
- .Add support for pie charts as well as bar and line graphs
- .(Support for displaying up to 2 output types in DPQL (such as DISPLAY BAR, TABLE
- .DPQL output bug fixes and improvements
- Improve plan listing in admin dashboard a bit
- Dont load offline sites
- .Basic graphing support (line and bar graphs) for DPQL reports
- Prepend new notify rows to list
- Fluid width for feedback vote button for other langs
- Fix setting agent owner when creating team filters from admin interface. This would result in it showing up in the agent interface due to the permission passing on 'own' filter
- 'Make possible to not use 2lvl select by adding class 'no-dp-select
- Need to set gateway and gateway address in NewTicket or else it'll be set after triggers execute
- Add language field that was missing in a few places
- Clean up massactions form a bit
- Fix tab scroll height correction

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours

.If you are using DeskPRO download, you can update your installation from the admin interface
