

DeskPRO Build #107 Released

Release Announcements - تعليقات (.) - Chris Padfield - 2012-08-24

.We are pleased to announce a new release of the DeskPRO helpdesk platform, build #107

:The following is an automatically generated list of changes in this release

- Hide the query editor from the main report builder page as well by replacing it with •
 - .an introduction section
 - .Only show the query when printing when it's not coming from a saved report •
 - Add automatic linking support when referencing a relationship (like tickets.agent) •
 - .(that has a known linking method (using ID only
 - Add basic LINK(print, url, [args]) function that allows links to be generated in HTML •
 - output. The link parameter defaults to being relative to the DP root and takes params
 - .in sprintf format
 - Fix offline message when no db connection made yet (eg cron from upgrade •
 - Fix a couple bad log lines •
 - Fix path to breadcrumb-bullet.gif •
 - Enable 'agent' grouping under team tickets •
 - Fix transaction nesting, possible un-persisted validating email record •
 - Fix invalid token name in resolveDeletedTicket •
 - Fix error when chat user comes back after timeout •
 - Handle when validating address already a user •
 - .Hide the query for a built-in report by default •
 - Ensure that the report loading indicator is always displayed and that you are scrolled •
 - .to the main report contents properly
 - .Clean up column titles on built-in reports where possible •
 - .Better display of the report list •
 - .Remove commas from year output •
 - .Favoriting a report adjusts the favorite list in the sidebar automatically •
 - Automatically adjust the height and labels usage on pie graphs that have a lot of •
 - .slices
 - .Use expandable textareas in the query builder •
 - .More spacing between report items •
 - .Larger default report sidebar •
 - .Make reports load via AJAX (hash change events) where possible •
 - Show send feedback window on JS error •

- After upgrades, clear the CSS cache blob so its regenerated based on any new css templates
 - Fix lic check counting deleted agents
 - .Add support for pie charts as well as bar and line graphs
 - .(Support for displaying up to 2 output types in DPQL (such as DISPLAY BAR, TABLE
 - .DPQL output bug fixes and improvements
 - Improve plan listing in admin dashboard a bit
 - Dont load offline sites
 - .Basic graphing support (line and bar graphs) for DPQL reports
 - Prepend new notify rows to list
 - Fluid width for feedback vote button for other langs
 - Fix setting agent owner when creating team filters from admin interface. This would result in it showing up in the agent interface due to the permission passing on 'own'.filter
 - 'Make possible to not use 2lvl select by adding class 'no-dp-select
 - Need to set gateway and gateway address in NewTicket or else it'll be set after triggers execute
 - Add language field that was missing in a few places
 - Clean up massactions form a bit
 - Fix tab scroll height correction
- If you are using the cloud version of DeskPRO, your account will have already been updated .or will be updated within the next 24-48 hours
- If you are using DeskPRO download, you can update your installation from the admin .interface
