DeskPRO Build #201 Released

[Deskpro Releases](#) - [تعليقات \(0\)](#) - Chris Padfield - 2012-12-06

.We are pleased to announce a new release of the DeskPRO helpdesk platform, build #201

.The following is an automatically generated list of changes in this release

- 'Update legacy database classes to using latest revision, fixes 'too many connections
- Better rejection types and explanation
- Add support for setting up an email gateway that allows agents to send messages to it that create draft
- .knowledgebase articles
- Fix tooltip over status showing agent name
- Fix order of some ticket logs
- Fix domain on widget example code
- Tweak escalation language to use same terms for awaiting agent/user
- Fix 'i want to' font
- .Fix feedback summary reports. Simplified and no longer does a query for every day for every agent
- Fix not using proper rating number in direct rating request
- Add link to getting started guide
- Add timer to start and end of cron command
- Prevent errors when using join/implode template functions in templates
- Send email alert if proc takes longer than 60 seconds
- If proc still open, need to exit to prevent dupe runs
- Update links from install errors to kb articles
- .Only show first response SLAs as "active" when the ticket is awaiting an agent
- Agent preferences to receive notifications for their own actions or just when they forward a message
- .(into the help desk (to confirm it was created
- .Use save points to allow nested transactions and partial rollbacks to work correctly
- Draft messages now maintain attachments and will update when metadata (attachments, note status)
- .changes but the message text has not changed
- Improve some server checks. - Installer detects disable_functions that will break the system - Installer
- detects invalid upload_tmp_dir - Admin file upload test detects invalid upload_tmp_dir - Better cron error
- reporting on quick-setup after install

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours

.If you are using DeskPRO download, you can update your installation from the admin interface
