Deskpro

DeskPRO Build #201 Released

Release Announcements - (۰) تعليقات - Chris Padfield - 2012-12-06

We are pleased to announce a new release of the DeskPRO helpdesk platform, build #201.

The following is an automatically generated list of changes in this release:

• Update legacy database classes to using latest revision, fixes 'too many connections'
• Better rejection types and explanation
• Add support for setting up an email gateway that allows agents to send messages to it that create draft knowledgebase articles.
• Fix tooltip over status showing agent name
• Fix order of some ticket logs
• Fix domain on widget example code
• Tweak escalation language to use same terms for awaiting agent/user
• Fix 'i want to' font
• Fix feedback summary reports. Simplified and no longer does a query for every day for every agent.
• Fix not using proper rating number in direct rating request
• Add link to getting started guide
• Add timer to start and end of cron command
• Prevent errors when using join/implode template functions in templates
• Send email alert if proc takes longer than 60 seconds
• If proc still open, need to exit to prevent dupe runs
• Update links from install errors to kb articles
• Only show first response SLAs as "active" when the ticket is awaiting an agent.
• Agent preferences to receive notifications for their own actions or just when they forward a message into the help desk (to confirm it was created).
• Use save points to allow nested transactions and partial rollbacks to work correctly.
• Draft messages now maintain attachments and will update when metadata (attachments, note status) changes but the message text has not changed.
• Improve some server checks. - Installer detects disable_functions that will break the system - Installer detects invalid upload_tmp_dir - Admin file upload test detects invalid upload_tmp_dir - Better cron error reporting on quick-setup after install

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated within the next 24-48 hours.

If you are using DeskPRO download, you can update your installation from the admin interface.
