DeskPRO Build #5.5.6 Released

Release Announcements - (0) تعليقات - Christopher Nadeau - 2017-05-02

is a minor update, primarily to address a regression where custom text fields might 5.5.6
.output HTML entities

Fixes

• Custom text fields would output HTML escaped tags (such a newlines appearing as
.("</"<br

• Agent] Filters with criteria on 'date archived' would cause an error]

• Agent] Filters with criteria on org labels would cause an error]

• Agent] Bogus errors would be netered into developer console log during heartbeat]
