DeskPRO Build #60 Released

Deskpro Releases - (١٠) تعليقات - Chris Padfield - 2012-07-23

.We are pleased to announce a new release of the DeskPRO helpdesk platform, build #60

:The following is an automatically generated list of changes in this release

- fix parse error in PersonFromEmailProcessor •
- Bad isChildOf causes attachNode to fail. We dont need this check so its a quick fix until official fix
 - Updated languages: Japanese Japanese: Added 298 phrases •
 - (Handle email from unregistered user but registrations are closed (eg. support usersource-only
 - Fix debug print_r, set domain in findIdentityByInput too •
 - Add mapping between usersources and custom data field •
- Improvements to usersources and AD Fix editing usersources not saving AD better maps email field based on principal name if no email defined Any usersource can add find_identity capability Gateway will try to find user from email address in find_identity capable usersources
 - Remember me login should be active from first load, not after redirect
 - Autolink: Catch www.'s without http:// and no path •

If you are using the cloud version of DeskPRO, your account will have already been updated or will be updated .within the next 24-48 hours

.If you are using DeskPRO download, you can update your installation from the admin interface
